# SOUDAL WINDOW SYSTEM YOUR AIRTIGHT SOLUTION

VAPOR TIGHT AND AIRTIGHT
SUSTAINABLE THERMAL AND ACOUSTIC INSULATION
WEATHERPROOF

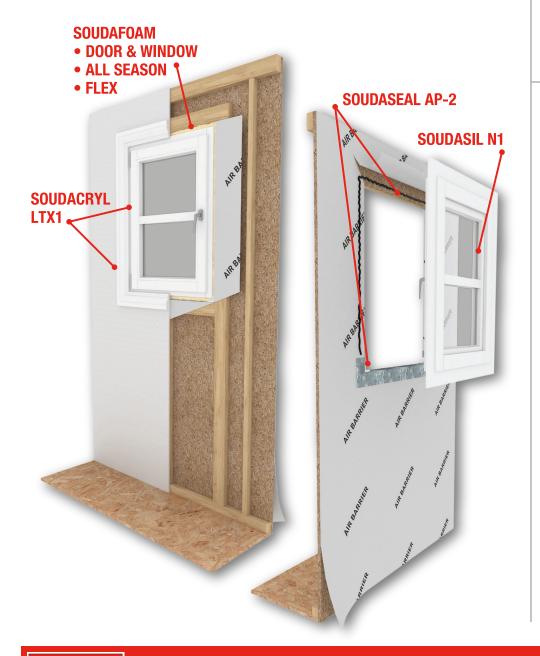

# **SOUDAL WINDOW SYSTEM**

ith heating and cooling costs skyrocketing, leaky buildings can be a big drain on a homeowner's budget. Air leakages (in- and exfiltration) are a big waste of energy and money, as are uninsulated or under insulated windows. Installing energy-efficient windows and doors can greatly reduce this energy loss, but the area around the window and door frames is often overlooked, still resulting in air leakages and thermal bridges. Your new windows will never perform well without proper installation!

Our products can be used separately, but are best used combined as the Soudal Window System.

The low expansion foam formulations of Soudal's foams differentiates it from other polyurethane foams. Closing the gap with the Soudal Window System not only helps to reduce energy costs, it also helps with the thermal and acoustic insulation, vapor diffusion and the watertightness of the window. It also enhances comfort and helps with the esthetic beauty of the window frame. SWS is active on three levels. When installed properly, SWS offers include: seal and vapor isolation on the inside, optimal thermal and acoustic insulation in the middle of the wall and, wind and weather protection on the outside of the wall.
